

Structural solution of a double sloping roof support on the cavity wall

DRAWING 2.1

NOTES:

- When choosing this design solution it is necessary to calculate the flexural strength;
- 2. It is recommended snow fence or fencing on the roof. It is not shown on the drawing;
- 3. Purlin anchor pitch and diameter is selected by calculation. Anchored below the floor slab;
- 4. Wall heat transfer coefficients according to STR 2.01.03:2009 requirements.
